Oakland Water Rates –
Feby 27 – 1895 – S. F. Chronicle

THE WATER RATES.

Report of the Special Committee of the City Council.

The special Committee on Water Rates, which submitted its report to the City Council on Monday night, prepared an exhaustive review of the existing conditions. A very thorough study was made of the report of the Contra Costa Water Company filed with the Council, and from it were gathered some interesting bits of information regarding the operation of the company for the year 1894.

The special committee found a grand total for the present value of the property of the Contra Costa Water Company, properly belonging to the system, of $1,554,902. The probable cost of the property is fixed at $1,931,569. The grand total of the probable cost of all the property belonging to the company not of value to the system is placed at $423,569.

"We would feel justified in using these figures as our valuation," stated the committee, "but, desiring to deal liberally with the company, we have added 10 per cent to these grand totals for possible contingencies. We now have: Present value, $1,710,392; probable cost, $2,124,659; value of property not properly belonging to the system, $427,744.

The Council decided a year ago that 5 per cent was a reasonable rate of interest to allow the Contra Costa Water Company. We have found no reason to change from the judgment of the Council at that time."

The report then shows the mathematical calculations followed in making a 20-per-cent reduction in present rates and leaving the water company its 5-per-cent income.

The report continues: "While the committee feel that they have demonstrated that the Contra Costa Water Company will receive a 5 per cent rate of interest on its investment, they do not desire to convey the impression that 5 per cent is all the company will receive. We find in the information presented by the company that $90,152 is charged for office expense, maintenance of street mains and general expense. We have accepted and used these figures, but in our judgment they are far in excess of what it should cost the company. We have not sufficient information at hand to disprove these figures, yet we believe that one-half this sum, properly and judiciously expended, would be ample to maintain the entire system in its present state of efficiency."

The report referred also to the fact that the company gained a revenue of $40,000, or nearly an eighth its entire annual revenue, from outside sources not affected by the city rates. "It is therefore the firm belief of this committee," concludes the report, "that, although we present an ordinance with a 20-per-cent reduction in existing rates, that the company will receive considerably more than 5 per cent on its investment."
